F A N E

DESIGNED BY
SÉRGIO BATISTA

F A N E

The Fane armchair is a style that never goes away - nor do the finishes, which are leather and provide a unique design and a lot of comfort. In addition, the solid wood structure, the steel staples and the PVA glue provide strength and prevent creaking. With Fane this is how it is: regardless of the environment, it always stands out.

The Fane armchair was created to be a highlight in the environment in which it is inserted, its unique design and the great comfort offered by the piece make it indispensable.

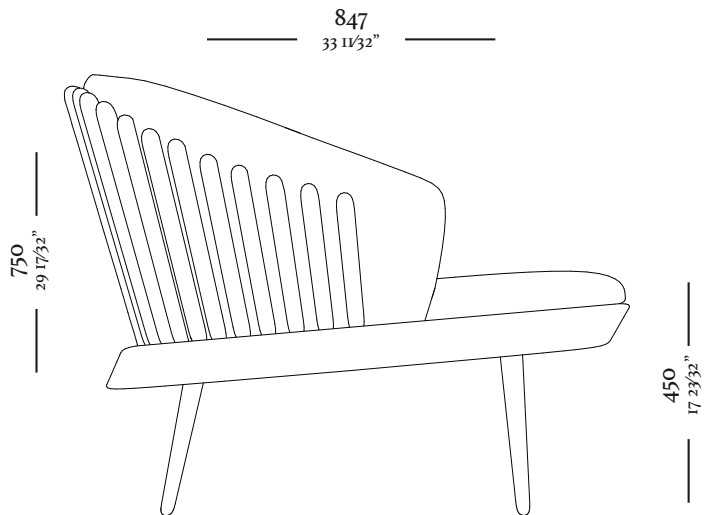

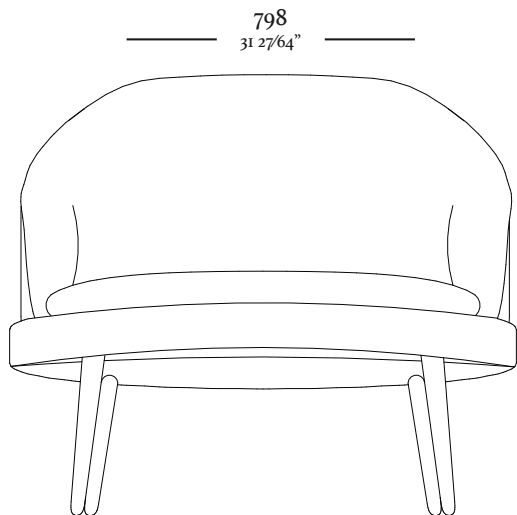

STRUCTURE

The Fane armchair has a solid wood structure. The product assembly has steel staples and PVA glue (suitable for wood), providing great resistance and avoiding creaking.

FINISHING

*Covers according to Uultis fabric palette, including leather.
Finishes: 079 - 148 - 145.*
