VICHI

DESIGNED BY
ESTÚDIO UULTIS

VICHI

Inspired by the stingray, the Vichi dining chair brings in its appearance the shape and movement of this marine animal. Its organic lines, backrest carefully designed to embrace the sitter, and a wooden detail with aerodynamic design and curves resembling the stingray's fins sculpted on the back, evoke its personality and welcoming form.

STRUCTURE

The structure of the Vichi chair is made of selected solid wood. The comfort layers feature high-density foam in the seat, while the backrest is made of medium-density foam and ecosoft wrap. The piece is supported by a rotating metal base. The backrest also has details in solid wood and natural straw on the back, which add even more personality to its organic features.

FINISHES/COATING

Finishes and coating available according to the price list. There is a wide variety of finishes and coating available to create unique pieces.
